THURSDAY, March 17-P. M Stocks were very dull again to day, and touched lewer prices, with but few exceptions, at both sessions of the Board. The market yields slowly, however, taking into consideration the almost total absence of estside interest in the speculative movements, and the preponderating bear influence at the Board. The argest bayers to day were for short account apparently, and there was but little, if any, effort on the part of the bulls to sustain prices. At the First Board New York Central declined to 797, and was dull at the quotation brough the day, with but moderate sales. Erie sold at 111, but was not much dealt in. The Convention of Railroad Presidents, adjourned from the St. Nicholas Hotel, was held at Buffalo yesterday, and upon the action of that meeting, will, no doubt, depend somewhat the immediate course of the market on these stocks. If, as threatened, an open rupture enemes, prices must be very much unsettled from the violent and utprofitable competition which will follow. But if, on the other hand, harmonious relations are reestablished, operators for the rise will take hold with more confidence. Reading was one of the firmest ks on the list during the day, and at the Second Board advanced to 491, closing at 49 bid. The movements of the Philadelphians, which seem to control this stock, are frequently opposed to the general inclination of this market, and Reading consequently often goes up or down, in a contrary direction to othe speculative stocks. The Western shares were very beavy, with but one or two exceptions, and quotations for Galens, Rock Island and Toledo, were 1 to 1 P cent lower than yesterday. Michigan Central was steady, without essential change in prices. Illinois Central was rather inactive at 671, but closed telerably firm. There is more stir than usual Michigan Southern Preferred, which, partly a sympathy with the common stock, and partly consequence of prejudicial statements as to financial position of the Company, and the prospeet of dividends, was sold down to 451, and for a tim was subjected to a tolerably smart hammeritg. Milwackee and Mississippi advanced 1, and was in rather ere was a fair business in State Stocks, resulting in a decline of in Missouris, with sales of \$89,000 during the day, and an advance of 1 in Tennessees. In Railway Bonds the transactions were inconsiderable, and the changes rather unimpor tant, except in La Crosse Land Grants, which w down to 16 at the First Board, but were a fraction better sgain in the afternoon. At the Second Board the changes were slight, as compared with prices estab-lished in the morning, but there was no vigor in the movements, and the market closed weak and dull. Operators on both sides, whether bulls or bears, are coming impatient at the stagnant condition of the market, and more animated movements, whether for tion by all. The closing prices were: For Missouri 6s, 85] #85]; Canton Co., 19] @20; Cumberland Coal Co. Preferred, 234 @234; New-York Central Railroad, 79 @791; Erie Railroad, 11 @111; Harlem Railroad, 11] 19; Hudson River Railroad, 311 w312; Reading Railroad, 49 w 491; Michigan Central Railroad, 511 w 511 Michigan Southern and Northern Indiana Railroad 13] @13]; De. Preferred, 45] @45]; Panama Railroad, 117] @117]; Illinois Central Railroad, 67] @67]; Galens and Chicago Railroad, 681 @ 681; Cleveland and Tole de Railroad, 261 2262; Caicage and Rock Island Railroad, 591 2591; Pacific Mail Steamship Co., 771 2

There is not much doing in foreign Bills, and quotasations are without change. Sterling, 109] # 109] for good to first-class signatures. France, 5.15 25 121.

To Liverpool, 430 bales Cotton at 3 16d.; 100 to: Beef at 3e.; 40 boxes Bacon at 15s; 300 boxes Cheese at 20s.; 1,800 bbls. Rosin at 1s. 71d. @1s. 9d.; 5 tuns Horns at 40s., measurement. To London, 500 boxes Cheese at 25s; 100 boxes Bacon at 20s. To Glasgow, 70 tans Logwood on private terms. A vessel of 220 tams from Machias to Cardenas and back to New York at 40c, for Sugar and \$3 for Molasses.

The business of the Sab-Treasury was: Receipts \$160,094 89; Customs, \$158,000; Payments, \$117,

095 15; Balance, \$9,316,408 63. The movement of the Banks in the four principal cities of the Union, in which weekly reports are made,

as shown by their last statements, is as follows:

Rew-York, Mar. 12, \$120, 25.261, 25.261, 26.262, 26.26

We hear of about \$300,000 in gold bars going by the Saturday steamer. The Havans steamer will take only a small amount of doubloons. The market is very strong for Government 5e, with some private at 104, including \$50,000 on 30 days. The ount which could be bought at 104 is not large. Holders generally anticipate an advance to 1041 or 165 within thirty days, especially if the bill before the Legislature, admitting these bonds under the bank law at par for circulation, is passed. It passed the Assembly to-day without epposition, and our advices from Albany are that it will be unopposed in the Sen-Treasury Notes were sold to the extent of \$100. atc. Treasury Notes were sold to the extent of \$100,-000 at 1-5th discount to par. Some considerable amounts of matured notes have been sent to Washingten for redemption. The risk and less of time of send ing these notes to Washington might just as well be ded as not were there any financial ability at the head of the Treasury Department. There is no reason why the matured rotes should not be paid upon presentation at the Sub-Treasury in this City that would not apply to the interest on the public debt which is paid here without difficulty. The business of the Clearing-House was large, amounting to \$25,633,-510. At the annual meeting of the stockholders of the Minnesota Mining Company held yesterday, the Directors' Report stoted the amount of mineral produced the last year to be 1,831 tans, yielding 70-100 4° cent of refined copper worth \$595,000; amount of working expenses \$385,000; not earnings about \$210,000, and available surplus assets on general statement \$240,000. The semi-annual dividend of \$5 ? share declared, pay-

abic on the 2d of May next, leaves \$140,000 of available serets, applicable to the semi-anomal dividend of November next. A dispatch from Milwankon states that the temperary injunction, granted upon the complaint of Edwin Townsend, against the La Crosse and Milwaukes Railroad, and Salah Chamberiain, lesses of the road, restraining the latter from paying the interest due the lat lestant on the second mortgage bonds of the Company, has been dissolved. It is stated that "the complaint will be amended." The United States Life Insurance Company, has declared of 22] V cent on preminms paid, and also the usual disbursement of

19 1-10 P cent on policies in force to March 5, 1859. The fellowing statement above the business of the

The increase this year is decided, and must be grati-

fying to the stockholders.

The Erie receipts are some \$50,000 behind the same period of last March. The Hudson River will, it is believed, show about the same as March, 1858, notwithstanding the river opens a week earlier. One half the effective equipage of this Road is now worked with Comberland coal, at very large saving over wood. The February earnings of the Cincinnati and Indianapolis Road show an increase of \$1,000, although the eastern end of the Road suffered a week's embar-

rasement from the fleed in the Obio.

We hear that there is a movement on foot to com mence actions against various country banks waish have been redeeming their circulating notes in Albany and this city at other places than the legally estab lished agencies. The ground upon which trees ac-

of this State:

No Corporation having banking powers, and none of its directors, efficers, agents or servants, shall directly or indirectly purchase, or be inte-sted in the purchase of any promisery note or other evidence of debt issued by such Corporation, for a less sum than shall appear on the face thereof to be then due, and every person violating the provisions of this section shall forfeit three times the nominal amount of the note or other evidence of debt so purchased.

From the not of May 4 1840, establishing agencies:

Suc. 2. Nothing in this art contained, shall be so construed as

From the act of May 4 10-19, establishing agencies:

SEC. 3. Nothing in this act contained, shall be so construed as
to authorize any incorporated bank, banking association or individual banker, to purchase her in or take up, directly or indirectly, their circulating notes, at an amount less than what purpoint to be due thereon, at any other place, or in any other manuer than is directed in and by this act.

The money market is quite easy to-day at 4 26 P cent on call, and 5@7 F cent on first-class paper. The demand is quite moderate. We have seen no resson as yet to change our already expressed views of the endencies of the money market. The development of business is not more certain than the more active employment of money, and we may count as confidently upon the opening of the various channels for its me, as upon the restoration of enterprise and trade. The relations between business and capital are intimate and inseparable, as everybody knows, and it is correquently quite as impossible for trade to revive and money to remain idle, as it has been for bufiness to stegnate and money to find employment at the same time. Hence, if we admit the revival of business, of which the evidences are quite conclusive, we cannot deny the sequence of a more active money market. The only point to be settled is in reference to the question of time to elapse before the real movements of capital following those of trade, must commence. That is to say, how long a period must clapse before an expansion of credit takes place sufficient to distribute money from its points of concentration. If we import largely in excess of our exports, our first disbursements are to foreign countries. If we embark vigorously and extensively in the manufacturing business, we send money to the South and West for raw materials-largely for cotton, and to a considerable amount for woolwhile in the labor which is at once called into action in turning out the fabric, we also set capital in motion. The first movements of trade, springing up during a period of monetary abundance, are conducted less upon credit and more upon a cash basis, especially at the points of origination, or fountain-heads, from which the flew commences. These movements give the first employment to money. Following them, and coming to the period when the credits-given in the second stages, from the first movers, who have the greatest money strength, to their constituents who are the distributing agents to the consumers—expire, and we arrive at the point when in a multitude of channels money is attracted by the temptations of profitable employment-in the movement of the crops, advances on consignments, transportation of merchandise by land, and by water, &c. In close proximity to these legitimate results o returning presperity, we may also look for the growth of enterprise in a thousand forms, much of it advantageous and profitable, and a great deal of it exuberant and unhealthy. In the contemplation of these results, some pear at hand, and other remote, we may find good reason for believing that the money glut is gradually passing away, and for anticipating greater activity in its employment as the year progresses. The banks, which in the natural course of things have become the depositories of idle capital, feel the first impulses of these trade movements, and are

mere theorists in political economy, and the grumbling of those who desire to hire money at cheap rates, to forward their own private speculations. The Secretary of the Interior has approved to the State of lows, under the act of May 15, 1856, selections of land to aid in the construction of railroads, as

shaping their measures accordingly. To pursue any

different course would be to disregard the ordinary

progautions of business men, and to float blindly along

on a sea of abundance without consulting chart, com-

pass or baremeter. The bank loans by the last re

turns were \$126,205,000-within about \$4,000,000 of

the highest point of expansion reached, while the spe-

cie line has been reduced from \$35,000,000 a \$25,500.

000, and the deposits from \$109,000,000 to \$86 000,000.

If we may draw conclusions from these figures, they

are all in favor of conservative measures on the part

of bank managers, without regard to the vaporings of

follows: For the Dubuque and Pacific Railroad. 1,152,138.32 Lowa Central Railroad 631,133,53 Mississippt and Missouri Railroad 383,431.15

Florida Railroad Company, 394,522 acres.

The annexed just remarks upon the Harlem Raiload are from The Ruilway Journal, published in this

Among the recoveries from the recent collapse in railroads, there has been no more substantial one than that of the Harlem. It has been the victim of two great frauds, which had so far affected its credit that that of the Harlem. It has been the victim of two great francis, which had as far affected its credit that it was one of the first to feel the great revulsion, and to suffer the most from it. All its securities went to a low figure. Its maranteed 8 P cent stock went down to 8 cents on the dollar. The read, too, ishored under the great disadvantage of having some millious added to its nominal cost by saccessive contract prices paid for construction, and by discount paid on the rale of its securities. The road, notwithstanding, possesses great inherent strength, which is now rapidly manifesting steelf, it has a valuable entrance into New York; much superior to that of the Hudron River Road, for passengers and freight. It has lately been quieted in the use of its pract for bosometre engines to Forty-second street, for a period of 30 years, by an ordinance of the City Council. This is a meet valuable concession, as only a few years will elapse before the whole Island, as well as a considerable belt of territory, for which it is not interfered with by any other road. This stration, we may star trailifier a considerable belt of territory, for which it is not interfered with by any other road. This strationy is rapidly becoming a market garden for the City of New-York. To show how innurence is be local traffic in this particular, we may star that its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal \$226.000 of amount its receipts from the milk trade alone equal

WEEKLY REVIEW

DRY GOODS MARKET. By the Mannfacturers' Cloth Hall Association.

A. H. ALMY, Manager.

New-Yerk, 137 Broadway, { THURSDAY EVENING, March 17, 1859. } There has been no important crange in the general trade since our last review. Its centralization to the great distributing houses is becoming more apparent. and with that class there appears to be no falling off sales; while the increase of arrivals from the West has given more activity to those houses who did not participate in the distribution of goods in January and February. The South western trade is about over, but the rear-by Southern buyers are in the market.

There is more confidence expressed as to the fature price of the chief staples of Domestic Goods, from the impression that there is to be no war in Europe, and that the extraordinary demand for the productions of the English manufactories, for exportation to the East, will give them fell employment, without attempting an expansion of their trade with the West. The official returns of the British Board of Trade for 1858 represent the most important increase ever known in their exports to the East.

The activity still continues, and the amount of ex-

ports for the month of January was nearly 100 P cent greater than for the same period last year. This demand for goods has induced the erection of new mills, filled with improved machinery, which will increase the productive power of England in a greater ratio than has been known for many years. If it should ultimately prove that India dibot continue to require as many goods as she is at present supplied with, we may look forward to a de-pression in manufactured goods in England, which would result disastrously to our manufacturing interests. In view of this, few capitalists can be found desirous of embarking in any new enterprises of that character in New-England.

Drills. The shipment of 1,800 packages of Domestics to China during the past week, is quite an important feature in the market, inacmuch as it has been generally understood that that market did not afford much encouragement to shippers. Thirty-inch Drills are firm at 81 @9 . Twenty-seven-inch Drills are more in-

quired for at about previous prices.

Brown Sheetings and Shirtings.

The demand for heavy goods is not large, and the production at the East is moderate. We learn that everal mills at the South have recently been placed on these goods, to supply a home demand. They have heretofore either produced a different style, or were idle altogether, as the ruling price of heavy makes during the last season was not remunerative. The medium Sheetings have advanced, in sympathy with the heavier goods. Light Shirtings continue in small stock, and a large demand exists. Large contracts would be made for future delivery of 40-inch goods, 60x60, weighing 51 yds, to the pound,

Bleached Sheetings and Shirtings. The supply of these goods is increasing, and the demand is quite equal to the production. Some mills heretofore engaged on Printing Cloths are producing the favorite makes of 72x80 and 84s, and are contracting to deliver up to the 1st of May; 2 Bleached Goods are more plenty, but the stock is not burdensome.

Printing Cloths.

The advancing tendency during the past few weeks has led the printers to panse in their purchases. It would have been far better for many engaged in printing the low styles of steams and chromes to have sold their goods contracted for early in the season at the present market rate in the brown state, than to submit to prices now offered for the finished article. The demand is chiefly for the lower counts, 52x56 and 56x60, although at any concession in price large sales could

The regular styles of Madder Prints are taken in a

moderate way at about previous prices, although some concessions are made where large lots are taken. Chromes and other styles have not maintained their price. We have the rather enomalous position of an advance in the gray goods and a decline in the srinted

There is no change, but we quote a dull market. Osnaburgs.

The recent sales have pretry much swept off the surplus stock which has been pressing upon the market for a long time. The supply from the South is quite unimportant, but some receipts are noticed from the East.

Catton Flauncis.

We have no change to report. There is a small demand for the goods-quite equal to the production The quantity printed this year, as compared with the last, has been very large. The engagements made by the chief printers for goods were made early in January, and no important demand exists from that

Denims and Stripes. These goods are well sold up. The demand has been good during the whole season. One year since the stock was large, and it was generally supposed that the consumption of goods could not overtake the proenction; but no class of goods has met with so ready | E | REED YARDS market. With any concert of action among makers, the prices would have advanced materially. The stock of all styles is light at present, and we quote an advance of ic. P yard since the first of the month.

Pantalooning, Kerseys, 5.c.

The principal manufacturers have been engaged on orders up to the present time, an no important stock exists. The advance in cotton, which enters largely in the cost of the goods, has given more firmness to the market.

Our market has been rather quiet the past week, owing to the fact that jobbers are busy at home, and but few new thirgs in the way of Fancy Woolens are coming out. There is a failing off in the demand for thin Woolens, as the clothing-houses, the large consumers of these goods, are now engaged on heavier fabrics for the Autumn trade. The medium qualities are not much sought after, but choice styles of superfine fabric are taken readily at full prices. The nearby trade are coming in, and promise to want their usual supply, but they purchase only such goods as are calculated for enstom-work. German Woolens are quiet; fancy mixtures, als weel and silk and wool, are gradually taking the place of the plain cloths of low and medium goods. The advance reported as having been sustained in Germany on all Woolens, will with difficulty be realized here on staple goods. Pilots and other heavy Overcoatings are selling readily at fair prices to the large clothing-houses. The South and West want their goods shipped in July and August; and, as several months are required to get up stock, there is no time to be lost in producing goods for this branch of trade. Satinets are moving slowly, but there is more inquiry for goods designed for printing.

Our private letters speak quite confidently of still further advance in Cotton goods, and the printed circulars state that more confidence is felt that there

will be ne rapture of peace between France and Austria, and buyers for Germany and the Mediterranean are extending their engagements wherever the range of prices admit of it, and their limits do not preclude

or his brother. R. W. Havens, are respectfully invited to attend without further invitation.

HINDS—In Brooklyn, on Thursday morning, March 16, Clarence Herbert, Infant son of Wm. L. and Sarah P. Hinda.

The babe has passed beyond Death's iter hand,
To join his sisters in the spirit lant.
Mischinks they be shown him from that bright above,
Where pain and death shall trouble him no more;
And as they beckon they point away
Where much is ever breaking on the day:
They welcome him to test fair Land of Light,
To whose bright morn there never comes a night—
For how can darkness come where "God is Light."

JACK SON—In Brooklyn on Wednesdes, March 16, Dr. Samuel
